

THE FOX CUB

SAFETY & USER INFORMATION

USING YOUR NEW FOX CUB

We want you to love using our new table
topper, so here are some tips for getting the
very best from your new posing surface

GETTING THE BEST FROM YOUR FOX CUB

As with any new prop or posing aid, it will take time to find your 'sweet spot' where it works perfectly for you. We suggest lots of practice.

You may need to adjust how much you fill the Cub, and the cushion, until you get the squish just right for how you work. You may also want to experiment with where you place the baby for best results.

THE CUSHION

The cushion can be filled as little or as much as you prefer, and you can experiment with posing baby on it, or use the hole without it.

You can even move the cushion around under baby to influence their position, and help you pose even better.

There are so many ways you can create magic with this amazing new feature.

SAFETY

Your table will come with two straps either side to ensure it is firmly attached to your table.

NEVER USE WITHOUT SECURING THE STRAPS.

BABY SAFETY

Not only is the hole a super posing aid, it is also designed to be a safety feature.

NEVER LEAVE A BABY ALONE ON THE TABLE WITHOUT REMOVING THE CUSHION

The hole can be safely used as a 'cradle' to keep baby settled safely while you prepare your next set up, for example.

REGULARLY TIGHTEN ALL YOUR TABLES SCREWS AND CONNECTIONS TO ENSURE CONTINUED SAFE USE

As with any posing table, joints can loosen with use, so regularly check and tighten Allen key screws if required to keep your table safe.
